XF-4000H (PESA)

Scale & Corrosion Inhibitor

XF-4000H (PESA) is a multivariate antiscale and corrosive inhibitor with non-phosphor and non-nitrogen, with good antiscale and dispersion performance to calcium carbonate, calcium sulfate, calcium fluoride and silica scale, with effects better than that of ordinary organophosphates and obvious synergism effects, when built with organophosphates.

Trade Name	XF-4000H (PESA)
Abbreviation	PESA
Chemical Name	Sodium salt of Polyepoxysuccinic Acid
Molecular Formula	HO(C4H2O5M2)nH
Commercial Form	Aqueous Solution
Molecular Weight	400-600

Typical Properties

Appearance	Colorless to amber transparent liquid
Solids content (%)	≥40.0
pH (1% solution) @ 20 ℃	10.0-12.0
Specific gravity (20 °C, g/cm 3)	≥1.30

Package and Storage:

210L HDPE Drum;1000L IBC(tote);Isotank
